ALUPROFI EXTRA 47X23.5 1.81 in

The ALUPROFI EXTRA loft ladders are characterized by single sealing and hatch thickness 1.81 in. The ALUPROFI EXTRA model is ideally suited to install where the attic is not insulated and required additional thermal insulation. The distinctive feature of the ALUPROFI EXTRA loft ladder is the light and extremely durable ladder made of high quality aluminum. The loft ladders have anti skidding feet, they adheres perfectly to the ground, prevent scratching of the floor and provide an aesthetic finish for the ladder after cutting. For increased safety and convenience of use, ALUPROFI EXTRA loft ladders are equipped in a stable and durable handrail. In the interest of user convenience, the handrail can be installed on the left or right side – depending on the customer preferences. The excellent quality of materials used for the production of loft ladders and attention to every detail of finish cause that the stairs will satisfy even the most demanding customers. Their maximum load during use is up to 352 lbs.

Technical specification

Insulated hatch thickness	1.81 in
Thickness of thermal insulation	1.57 in
